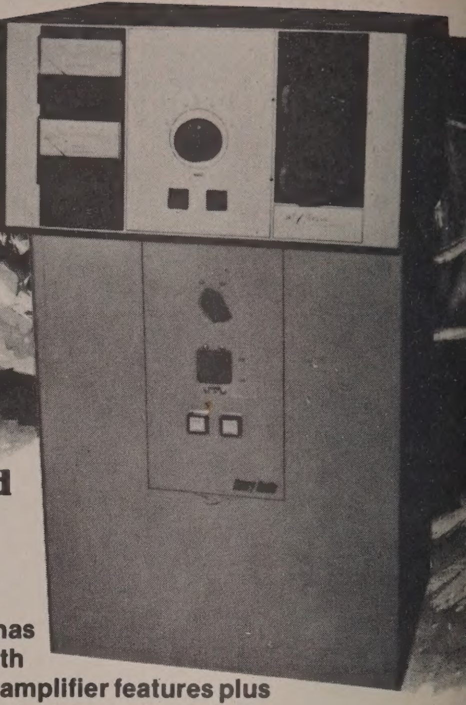
60th Anniversary Edition

For Use Throughout 1982

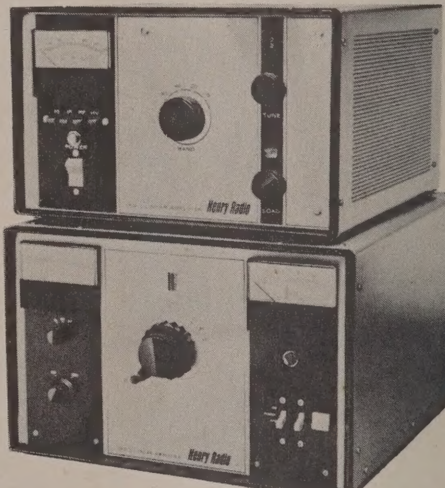
3K Classic



We think it's the world's finest amateur linear amplifier...and we think you'll agree with us.

Ever since we made our first Amateur amplifier almost 20 years ago, our goal has been to make the finest, most rugged and reliable amplifier possible. Now with the 3K Classic we have accomplished this. It contains all of the famous Henry amplifier features plus the magnificent 8877 tube, rugged heavy duty power supply components and advanced antenna switch relay for semi break-in on CW. This is the amplifier of every Amateur's dreams.

The 3K Classic/X with heavy duty power supply and 10 meter operation is available for sale outside the USA where FCC type acceptance is not required.



The 2K Classic The 2K Classic represents the culmination of years of experience in developing, manufacturing and improving the 2K series. It remains as always a "workhorse", engineered and built to loaf along at full legal power for days or weeks without rest. A look inside shows why! It is truly a "Classic" amateur amplifier. Heavy duty, top quality components along with its rugged construction assures you trouble free operation. It will put your signal on the air with greater strength and clarity than you ever dreamed possible. The 2K Classic operates on all Amateur bands, 80 through 15 meters (export models include 10 meters).

The 1KD-5 ...Another fine member of the famous Henry Radio family of superior amplifiers. And we're still convinced that it's the world's finest linear in its class. The 1KD-5 was designed for the amateur who wants the quality and dependability of the 2KD-5 and 2K-4, who may prefer the smaller size, lighter weight and lower price and who will settle for a little less power. But make no mistake, the 1KD-5 is no slouch. Its 1200 watt PEP input (700 watt PEP nominal output) along with its superb operating characteristics will still punch out clean powerful signals...signals you'll be proud of. Compare its specifications, its features and its fine components and we're sure you will agree that the 1KD-5 is a superb value.

The 2KD-5 We have been suggesting that you look inside any amplifier before you buy it. We hope that you will. If you "lift the lid" on a 2KD-5 you will see only the highest quality, heavy duty components and careful workmanship...attributes that promise a long life of continous operation in any mode at full legal power. The 2KD-5 is a 2000 watt PEP input (1200 watt PEP nominal output) RF linear amplifier, covering the 80, 40, 20, and 15 meter amateur bands. It operates with two Elmac 3-500Z glass envelope triodes and a PI-L plate circuit with a rotary silver plated tank coil.

Henry amateur amplifiers are available from select dealers throughout the U.S. Don't forget the rest of the Henry family of amateur amplifiers ...the Tempo 2002 high power VHF amplifier and the broad line of solid state amplifiers. Henry Radio also offers the 4K-Ultra high power H.F. amplifier and a broad line of commercial FCC type accepted VHF and UHF handhelds and amplifiers for two way FM communications.

Tempo S4
Tempo S4

tempo hand helds...World famous!

Tempo was the first with a synthesized hand held for amateur use and now offers the broadest line of field tested synthesized portables...one and five watt units in the 144 to 148 MHz range, plus outstanding radios for the 220 and 440 MHz range. External microphone capability, rubber flex antenna, 450 ma ni-cad battery pack, charger and earphone is all standard. Touch tone pads and 13.8 VDC power amplifiers are available for all units.

Call or write for more information. Also available from Tempo dealers throughout the U.S.

Henry Radio stocks a complete inventory including Bird, Collins, Cubic, Drake, Icom, Kenwood, Yaesu and many, many more.

The home of RADIO AMATEUR CALLBOOK...a modern air-conditioned building planned for maximum efficiency in the production of Callbooks and Callbook products.

A year-round staff, through the use of electronic data processing equipment, evaluates and compiles the directory information received daily from all over the world. Extensive library and historical records are maintained to provide the most complete and accurate Callbook possible. The Callbook had its beginning in 1920 when there were very few radio amateurs. Today, Callbooks and Callbook products are in use in every country of the world.

For Serious Amateurs Only

The HQ2, a Broadband Tribander with no compromise.

You could spend a full day assembling and erecting this "highly visible" quad antenna. But, if you're that serious about your amateur hobby, you'll be rewarded with antenna performance that puts you one step closer to your dream of an "ideal" installation.

The HQ2 is a 2-element quad antenna in a complete kit, ready to assemble -- designed and tuned by the best antenna engineers in the industry. Heavy-duty construction includes taper swaged aluminum tubing, aluminum stranded wire, die formed spreader-to-boom clamps, cycolac insulators, plus a universal tiltable boom-to-mast clamp.

The **HQ2 Hy-Quad** features:

BROADBAND: Less than 2:1 SWR across virtually the entire 10, 15 and 20 meter bands.

DIRECTIONALITY: F/B and F/S ratios better than 3-element yagis and forward gain comparable to TH3Mk3.

SHORT BOOM: Turning radius - 13½ ft. (4.1 m).

SINGLE FEEDLINE: One feedline for all three bands.

SOLID TUNING: Less susceptible to surrounding objects and less critical of height.

SPECIAL ARRL QN SIGNALS FOR NET USE

QNA*	Answer in prearranged order.
QNB*	Act as relay Between. . . . . and . . . .
QNC	All net stations Copy. I have a message for all net stations.
QND*	Net is Directed (controlled by net control station).
QNE*	Entire net please stand by.
QNF	Net is Free (not controlled).
QNG	Take over as net control station.
QNH	Your net frequency is High.
QNI	Net stations report in.* I am reporting into the net.
QNJ	Can you copy me? Can you copy . .?
QNK*	Transmit messages for . . . . to . . . .
QNL	Your net frequency is Low.
QNM*	You are QRMing the net. Please stand by.
QNN	Net control station is . . . . . . * What station has net control?
QNO	Station is leaving the net.
QNP	Unable to copy you (or . . . .).
QNQ*	Move frequency to . . . and wait for . . . to finish handling traffic. Then send him traffic for . . . .
QNR*	Answer . . . and Relay (or Receive) traffic.
QNS	Following Stations are in the net.* (Follow with list). Request list of stations in the net.
QNT	Leaving net Temporarily (or for . . . minutes).
QNU*	The net has traffic for YOU. Stand by.
QNV*	Establish contact with . . . . . on this frequency. If successful, move to. . . . and send him traffic for. . . .
QNW	How do I route messages for . . . . . ?
QNX	You are excused from the net.* Request to be excused from the net.
QNY*	Shift to another frequency (or to . . . kc.) to clear traffic with . . . . . .
QNZ	Zero beat your signal with mine.

*For use only by Net Control Station

Notes on the Use of QN Signals

1. The QN signals listed above are special ARRL signals for use in amateur c.w. nets only. Other meanings which may be used in other services do not apply.
2. Some QN signals are for use by net control stations only; these are marked with an asterisk(*). Others have slightly different meanings when used by the NCS and net stations; in this case, the meaning when used by the NCS is marked with an asterisk (*).
3. Some QN signals have two meanings, the difference depending on how or by whom used. Examples: (a) QNC, when used as a preface to transmission of a message, carries its first meaning; when used by a station reporting into the net (e.g.,W9NCS DE W9NET QNI QNC), it carries its second meaning. (b) QNI, when used by the NCS, is a request for stations to report in; when used by a net station, it means that this station is reporting in. (c) QNJ, when used alone, carries its first meaning; when followed by a call, it carries the second meaning.
4. QN signals are never followed by a question mark, even though the meaning may be interrogatory.
5. Do not use QN signals on phone nets. Say it with words.
6. Use QN signals in nets only. They are not for use in casual amateur conversation.
7. Make frequent use of standard international "Q" signals in traffic nets for meanings not covered by QN signals. Examples: QRU, QRV, QSV, QTA, QTB, QTX, etc.

NEW Extended Double Zepp Antenna Design

The Hy-Gain V2 is 2-meter extended double zepp vertical consisting of two stacked 5/8 waves properly decoupled to allow no RF on the coax feedline. Coax connects to the decoupler inside the antenna for complete weatherproofing. Mechanically the V2 has no equal. It's easy to assemble and all elements are corrosion resistant 6063-T832 aluminum with rustproof hardware. The V2 is a complete antenna that's ready to mount on any mast up to 2" (50.8 mm) in diameter.

Two sets of 1/4 wave radials and a centered feedpoint put the radiation at the horizon, not the sky! The V2 and two competitors were measured for radiation efficiency on a ground-reflection-range, which was designed according to IEEE standard 149-1979, and the results shown below were conclusive.

Designed to operate from 138 MHz through 174 MHz, the V2 obtains a VSWR of less than 1.5:1 at resonance and has a 2:1 VSWR bandwidth of at least 7 MHz. The antenna's isolation from the support mast is 20 dB minimum.

The new V2 will equal or surpass the electrical performance of any competitive two stacked 5/8 wave antenna, regardless of gains claimed or your money back. Money-back limited to 30 days. If not satisfied, return to place of purchase.

A.R.R.L. COUNTRIES LIST

The ARRL Postwar Countries List is the official standard used in connection with the DX Century Club. To qualify for the DX Century Club Award, an applicant must submit confirmations from at least 100 different countries contacted after November 15, 1945, in accordance with the Postwar DXCC Rules. Copies of the DXCC Rules will be furnished by ARRL on request.

Use of this standard list is recommended by ARRL. Haphazard selection of words often results in confusion. A degree of uniformity in use of phonetic words reflects favorably on your individual operating, and on the whole amateur service.

ON GOOD PHONE OPERATING

1. Listen much . . . with care. Avoid distractions in your operating room. Tune the band well after each call.
2. Time your calls; monitor your own frequency. Call only when a station is free.
3. Make short calls, with breaks to listen. Speak clearly, at a steady, modest rate. Three short calls are better than one long one.
4. Use push-to-talk technique . . . speak near the mike. Watch the modulation indicator. Keep local background noise at a minimum.
5. Make notes. Avoid missing points for comment. Jot down topics to avoid repeats.
6. Talk in connected thoughts and phrases. Notes will help avoid mixing up subjects. Push-to-talk technique will keep brother amateurs from calling you a monologist.
7. Speak naturally. QSOs need not be cut and dried. Make them interesting. Avoid exhibitionism. Use proper operating form to promote efficiency in communication and add respect and prestige for your station.

18HT
Hy-Tower
The World's Finest Multiband Vertical

The 18HT Hy-Tower is the only full size, 80 thru 6 meter, automatic band-switching vertical antenna on the market today. A unique stub decoupling system effectively isolates various sections of the antenna to provide a full quarter wavelength antenna on 80 and 40 meters, and a pattern-compressing 5/8 wavelength radiator on 20, 15 and 10 meters. The 24 foot tower section of the antenna, in combination with the decoupling system, achieves excellent bandwidth.

The Hy-Tower, a "low visibility" antenna, takes less than three sq. ft. (2.8 sq. m) of real estate and uses top quality materials and construction. The entire all-band system is fed with a single feedline. Installation and maintenance are simplified by a unique hinged, tilt-over base. Excellent performance can be achieved with a ground system of 6 ground rods at the base of the antenna. Performance can be further optimized with the installation of a buried radial system. 160 meters can be added to the antenna with the installation of a base-loading coil, and an additional kit will be available when the new WARC bands are authorized, adding all three of these new bands to the Hy-Tower.

BEAM PERFORMANCE—A system of two or three Hy-Towers can be installed as a phased array, delivering true beam performance on any two adjacent bands. A rotatable beam signal on 40 and 75/80 meters! Imagine what that will do for your transmit and receive signal! We have a complete engineering technical data report on phased verticals. Write for your free copy today.

In the proud tradition of the S/Line and KWM-2: Collins KWM-380.

What is "tradition"? Fifty years of HF communications experience and a high technology base that makes us an industry leader. Plus added value like the KWM-380 12-month warranty and 24-hour factory "burn-in" followed by individual testing and calibration of each transceiver.

The Collins KWM-380 gives you "tradition" in one box. Microprocessor control provides operation from the front panel or optional remote interface connector. Plug-in read-only-memory I.C. allows the addition of WARC band changes. Built-in AC/DC power supply lets you operate almost anywhere.

Rate selectable tuning to 10 Hz with frequency memory and split VFO provide excellent operational flexibility.

The Collins KWM-380. A sound investment that offers excellent resale value. See it at your authorized dealer. Collins Telecommunications Products Division, Rockwell International, Cedar Rapids, Iowa 52498. Phone 319/395-5963. Telex 464-435.

Valor's comm X™ and omni~gain™

quality amateur mobile antennas

Valor's "comm-X" and "omni-gain" antennas are 5/8 wave length design, rated at 200 watts. Both have a typical gain of 3dB over 1/4 wave standard. Adjustable whips allow field tuning for optimum VSWR, typically 1.5:1 or less at resonance. Chrome-plated brass ferrule fits standard 3/8-24 mount. Omni-gain antennas have a unique matching section that eliminates copper coil for maximum efficiency.

STANDARD TIME THROUGHOUT THE WORLD

The standard time system is based on the theoretical division of the surface of the globe into 24 zones, each of 15° of longitude. The initial zone is the one which has as its central meridian the Greenwich Meridian and with the meridians 7° 30′ E and 7° 30′ W as its eastern and western limits. Time in this zone is called Greenwich Mean Time, or GMT. Places to the east of Greenwich are ahead of GMT, while places to the west are behind GMT. Not all countries follow the International Time Zone System, but will use the time of some principal city as a standard or will have no standard time at all.

Reference —"Standard Time Chart of the World" No. 5192, published by the U.S. Navy Hydrographic Office, Washington D.C.

The theoretical system described is applied, in a strict sense, only in oceanic regions. On land or on groups of islands the system is applied with certain local deviations made necessary by frontiers or to permit an entire island group to have the same time zone. The time used in each country, whether it is the time of the corresponding zone or a modified time, is fixed by law and is called legal time, or more generally, standard time.

Another deviation from this theoretical system is that certain countries, for economic reasons, modify their legal time for part of the year, especially in summer, by advancing it an hour or another fraction of time. Where such deviations are maintained on a year-round basis, the time kept is considered to be standard time.

Compact.

Only 3.7 in (H) x 9.5 in (W) x 10.8 in (D) will fit into most mobile operations (compact car, airplane, boat, or suitcase)

Affordable.

Priced right to meet your budget as your main HF rig or as a second rig for mobile/portable operation.

Convenient.

- Unique tuning speed selection for quick and precise QSY, choice of 1 KHz, 100 Hz or 10 Hz tuning.
- Electronic dial lock, deactivates tuning knob for lock on, stay on frequency operation.
- One memory per band, for storage of your favorite frequency on each band.
- Dual VFO system built in standard at no extra cost.

Full Featured.

- 200W PEP input—powerful punch on SSB/CW (40 W out on AM)
- Receiver preamp built-in • VOX built-in
- Noise blanker (selectable time constant) standard
- Large RIT knob for easy mobile operation
- Amateur band coverage 10-80M including the new WARC bands
- Speech processor—built-in, standard (no extra cost)
- IF shift slide tuning standard (pass band tuning optional)
- Fully solid state for lower current drain
- Automatic protection circuit for finals under high SWR conditions
- Digital readout • Receives WWV • Selectable AGC
- Up/down tuning from optional microphone
- Handheld microphone standard (no extra cost)
- Optional mobile mount available

The above table shows the great circle bearing in degrees, of various metropolitan areas in the United States in relationship to large cities throughout the world. This table should be used from left to right only. To find the great circle bearing between any two of the cities shown, start at the left and follow the horizontal line to the right until you come to the column directly under the name of the city that you desire to beam a radio signal to. For all practical purposes in the United States, Polaris (the North Star), is due north. To find this star, to calibrate a directional radio beam, look for the first star on a straight line with the two outer stars on the outside edge of the cup of the big dipper. This table was compiled from information furnished by the U. S. Coast and Geodetic Survey.

Dick Bash - KL7IHP

Here, finally, is a series of test guides that makes upgrading your license a snap! Passing the FCC exams and getting more privileges will now be easy. The General (also good for the Technician), Advanced, Extra Class editions of *THE FINAL EXAM* are humorous and easy to read, but more importantly they are *accurate!* We know of no other manuals whose material is as close to the actual FCC questions and answers as that found in these books. Written by Dick Bash - KL7IHP, who feels *upgrading shouldn't be degrading*, the guides are constantly kept up-to-date. Come to *THE FINAL EXAM* for the *solution to exam pollution*! The General, Advanced, and Extra Class editions are available at dealers nationwide. If ordering direct from the publisher, please enclose $11.95 per copy ($9.95 + $2.00 postage and handling).

Attention instructors! Now your days of being *ham*strung when teaching a Novice class are over. The Novice Class edition of *THE FINAL EXAM* is in use in clubs all around the country. If you are looking for a Novice Class manual that is written for someone with no background in electronics, if you would like to use a manual that is funny and a delight to read, if you are tired of the usual text that is being cranked out for the innocent Novice, then order a copy of the Novice Class edition of *THE FINAL EXAM.* Dick wrote the Novice manual for use in either a class room setting or for home study. Again, these manuals are available at your dealer or by ordering direct from the publisher (enclosed $6.95 per copy - $4.95 + $2.00 postage and handling).

Want the ultimate in theory books? Order *Electronic Communication* (4th edition) by Robert L. Shrader - W6BNB. This is an easy to comprehend text containing over 800 pages of everything you're going to ever need to know regarding theory. Order yours today by sending $27.45 ($23.95 + $3.50 shipping).

C/M

SRI OM I DON'T QSL!...

How many times have you heard that on the air? Probably never. Yet rare stations sometimes run out of cards, time, current address info, or the funds necessary in order to honor every request. The **Confirmation Mailer** is a two part "reverse QSL" designed to solve these problems and also insure that you receive prompt documentation of your contact.
You simply fill out the other stations call, QSO information, and address on one part of the card. Then fold the **C/M** around your QSL or IRC's and send it.
Once received the other operator checks the log info, signs the **C/M** if it is accurate, and returns it to you by folding the card in order to expose your return address.
C/M's come in five color packets along with complete instructions. $5.95/PK.

DX OPERATING CODE

(For W/VE Amateurs)

Some amateur DXers have caused considerable confusion and QRM in their efforts to work DX stations. The points below, if observed by all W/VE amateurs, will help make DX more enjoyable for all.

1. Call DX only after he calls CQ, QRZ? or signs SK, or 'phone equivalents thereof. Make your calls short.
2. Do not call a DX station:
    a. On the frequency of the station he is calling until you are sure the QSO is over (SK).
    b. Because you hear someone else is calling him.
    c. When he signs KN, AR or CL.
    d. Exactly on his frequency.
    e. After he calls a directional CQ, unless of course you are in the right direction or area.
3. Keep within frequency band limits. Some DX stations can get away with working outside, but you cannot.
4. Observe calling instructions given by DX stations. Ex: "15U" means "call 15 kc. up from my frequency". "15D" means down, etc.
5. Give honest reports. Many DX stations depend on W/VE reports for adjustment of station and equipment.
6. Keep your signal clean. Key clicks, ripple, feedback or splatter give you a bad reputation and may get you a citation from FCC.
7. Listen and call the station you want. Calling CQ DX is not the best assurance that the rare DX will reply.
8. When there are several W or VE stations waiting, avoid asking DX to "listen for a friend". Also avoid engaging him in a rag chew against his wishes.

(For Overseas Amateurs)

To all overseas amateur stations:

In their eagerness to work you, many W and VE amateurs resort to practices which cause confusion and QRM. Most of this is good-intentioned but ill-advised; some of it is intentional and selfish. The key to the cessation of unethical DX operating practices is in your hands. We believe that your adoption of certain operating habits will increase your enjoymant of amateur radio and that of amateurs on this side who are eager to work you. We recommend your adoption of the following principles:

1. Do not answer calls on your own frequency.
2. Answer calls from W/VE stations only when their signals are of good quality.
3. Refuse to answer calls from other stations when you are already in contact with someone, and do not acknowledge calls from amateurs who indicate they wish to be "next".
4. Give everybody a break. When many W/VE amateurs are patiently and quietly waiting to work you, avoid complying with requests to "listen for a friend".
5. Tell listeners where to call you by indicating how many kilocycles up (U) or down (D) from your frequency you are listening.
   Ex: c.w. - "CQ DX CQ DX CQ DX 15U DE AC4YN AC4YN AC4YN 15U K"; 'phone - "Answer 15 kilocycles up from my frequency".
6. Use the ARRL - recommended ending signals, especially KN, to indicate to impatient listeners the status of the QSO. (KN means "Go ahead (specific station), all others keep out".
7. Let it be known that you avoid working amateurs who are constant violators of the above principles.
